Double Sheet.

On Saturday THE STAR will appear in double sheet form, with a large amount of varied and interesting reading matter. The double-sheet issues of THE STAR are always immensely popular, and a very large extra edition is required to supply the demand. Our advertisers are aware of this fact and avail themselves of the opportunity to reach the eye of the large number of additional readers here and elsewhere, and usually set forth their claims for patronage in some detail. In order to give them the fullest benefits of proper display, position, and classification, we would ask that they send in their announcements intended for the double sheet as early as possible, and if practicable not later than Friday evening.

The Plot of the Gold Gamblers.

From New York comes the report that a number of brokers have banded together and expect by lobbing in gold to make money out of resumption. They are reported to have in their possession from eight to twelve millions of gold. With this amount they could do nothing whatever to embarrass the Treasury in carrying out the resumption act. The Treasury could easily frustrate any attempt they might make to raise the price of gold. It is understood, however, that they intend to borrow as many greenbacks as possible on the gold they have. When the greenbacks thus secured they count on the Gold-Freedom in New York on and after the 1st proximate and paying their equivalent in gold. Upon this gold they could again borrow greenbacks and get more gold.

This is held to be the only way in which they could manage to shake confidence in the ability of the Treasury to maintain resumption, and consequently put gold above its par value.
